PDF CREATION
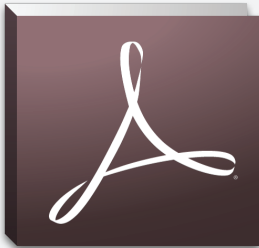

When creating PDF's to submit for print please use a recognised PDF-Maker such as **Acrobat Distiller**. Using a design package's own PDF maker may result in your job being rejected. Always save as a **High Quality or Print Quality PDF**. If using Acrobat Distiller, choose **PDF/X-la:2001** from the drop-down list. When creating your PDF please embed all fonts.

Always view your PDF with Output Preview open before submitting it for print as this gives the most accurate representation of how the file will look once printed, and may flag up errors that aren't visible without Output Preview open.

If you are having trouble creating a PDF, smallpdf.com provides online tools to solve common problems.
